TradeMark Nitrogen commissions 500,000 gallon tank project from Precision Build

(September 29, 2023) TradeMark Nitrogen today announced a strategic project with Precision Build to plan, build and install a new 500,000-gallon stainless steel tank.

“We are thrilled to move forward with Precision Build on this long-anticipated project!” said Mike Barry, CEO of TradeMark Nitrogen. “This is a strategic infrastructure upgrade—it’s what we call a working tank--that we’ve been discussing and dreaming about for over a decade, and it’s incredibly rewarding to see it finally taking shape.”

Precision Build, a Tampa-based storage and fabrication company, will partner with TradeMark Nitrogen throughout the project.

“Precision Build has demonstrated exceptional expertise and dedication during the planning phase already,” said Barry. “We are confident that they will deliver a state-of-the-art, highest quality tank.”

More updates will be shared as the project moves forward.
